

## Acoustic Surveys

We are independent, dynamic and experienced noise control specialists with extensive experience in the field of occupational and environmental noise. We undertake all the necessary work to relieve employers of the concern and administration of industrial and workplace noise surveys and provide practical solutions and advice suited for specific industrial situations.

We recognise that understanding our clients' requirements and goals is the key to our success. We will help to protect the health of your employees from noise by firstly assessing the noise environment at your premises then in close cooperation with your appointed Health and Safety Manager design the most effective noise mitigation strategy.

We pride ourselves in providing practicable and cost effective acoustic solutions and offer a flexible approach. We offer services tailored to customer needs to ensure compliance with current regulations and standards. Our consultants will professionally advise you on how to best apply noise management and mitigation measures to ensure protection of your employees and public.

We have built a competent, professional team of highly motivated consultants who are committed to providing excellent client service. Our experience covers all aspects of noise and vibration and we are up to date with the latest standards and regulations.

As a professional consultancy we make sure that we use only high quality accurate instrumentation and software so that we provide information that can be confidently relied upon.
